TECHNICAL SKILLS

Backend & APIs
Python | FastAPI | REST APIs | SQLAlchemy | Node.js | PHP | Java | C++

Data & Cloud
PostgreSQL | MySQL | Oracle | Supabase | Firebase | Railway

Frontend & Platforms
React | HTML5 | CSS3 | Flutter | WordPress

AI & Engineering Tools
OpenAI API | Zapier | Git | GitHub | Docker | Linux | CI/CD | UML

LANGUAGES

- Arabic - Native
- French - Native / Bilingual
- English - Advanced
- German - Beginner

CORE STRENGTHS

- Backend problem solving
- AI workflow integration
- Adaptability
- Teamwork
- Attention to detail

Rouane Mounssif

SOFTWARE ENGINEER - AI WORKFLOW SPECIALIST

Software engineer and AI Workflow Specialist who researches problems, prototypes rapidly and turns ideas into practical apps, automations and digital products. Comfortable adapting across stacks and tools, choosing efficient approaches, integrating APIs and AI, and iterating from research and experimentation to reliable, convenient user-facing solutions.

PROFESSIONAL EXPERIENCE

- Final-Year Software Engineering Internship** 2024
DIAL TECHNOLOGIE - Casablanca
Built a custom WordPress plugin and multiple Zapier automations, using AI-assisted workflows to streamline repetitive business tasks.
- End-of-Year Software Project** 2023
EMSI - Casablanca
Developed an online shopping application using Flutter, PHP, Firebase and the BLoC pattern.
- Data Management Internship** 2022
DFI INTERNATIONAL - Casablanca
Contributed to improving and streamlining data-management processes.

SELECTED PROJECTS

- Wardrobe AI Backend**
FastAPI | OpenAI | Railway
Client-facing API that analyzes fashion images, returns structured JSON and generates style-profile suggestions.
- FlowForge**
FastAPI | PostgreSQL | SQLAlchemy
Backend project with authentication, database migrations and clean REST API architecture.
- PDFbright**
Micro-SaaS | PDF Diagnostics
Product focused on diagnosing PDF problems clearly before guiding users toward the right repair workflow.
- Neural Critic**
Supabase | CI/CD | SEO | Analytics
Gaming publication with editorial tooling, reader features, automated publishing, search optimization and analytics.
- TrafficVerdict**
Analytics | GA4 | OAuth | PostgreSQL
Analytics product that connects traffic data sources and turns raw site metrics into clearer, actionable insights.
- Terminalia**
Next.js | React | TypeScript | Interactive UI
Browser-based cinematic terminal studio for building reusable fictional computer scenes, sequences and interactive environments.
- FlowRun**
Workflow Product | Rapid Prototyping
Explores simpler, faster ways to package multi-step tasks into a convenient product workflow, with an emphasis on usability, iteration and efficient implementation.

EDUCATION

- Engineering Degree in Computer Science**
EMSI - Casablanca - 2019-2024
- High School Diploma - Physics & Chemistry**
Lycee En-Nour 2 - Casablanca - 2017-2018

CERTIFICATIONS

React | Front-End UI Frameworks | DevOps | Cloud Computing | Node.js | Express | MongoDB | Oracle Database Administration | Java for Android | HTML5 | CSS3 | Python
